Professional Summary

Information Technology engineering student and software developer with 2+ years of hands-on development practice across full-stack applications, AI-powered systems, and automation. Experienced in multi-agent LLM workflows, local model deployment, backend development, and automated software testing. Also brings startup leadership, product planning, and team coordination experience. Seeking a technical internship to contribute to real-world projects and learn from experienced professionals.

Education

Bachelor of Engineering (Information Technology) **Expected Graduation: 2028**
Siddhant College of Engineering, Pune (Savitribai Phule Pune University)

Technical Skills

AI / ML	LLMs, Multi-Agent Systems, Agent Orchestration, Prompt Engineering, OpenAI API, Ollama, Local LLM Deployment, Automated Evaluation
Languages	Python, JavaScript, SQL
Backend	Node.js, Express.js, REST APIs, MongoDB, MySQL, Authentication
Frontend	React.js, Next.js, Tailwind CSS
Tools	Docker, Linux, Git

Projects

AI Dev Pipeline – Multi-Agent Software Engineering System

- Designed a multi-agent pipeline that translates software requirements into applications using specialized Architect, UI/UX, Database, Frontend, Backend, Security, DevOps, and Documentation agents.
- Integrated local LLMs through Ollama with model fallback and resource checks for hardware-aware model selection.
- Built an automated QA and repair loop covering dependency installation, testing, builds, server validation, HTTP health checks, and iterative correction.
- Implemented job queuing, crash recovery, duplicate detection, structured logging, API authentication, and pipeline monitoring.

ADEX_ISL – Offline Indian Sign Language Communication Device

- Developing a prototype exploring an offline communication pipeline using a camera, sign recognition, a local LLM, and text-to-speech.
- Auditing and preparing the CISLR Indian Sign Language video dataset for model training.

AI Communication Platform

- Built an AI-powered communication platform integrating WhatsApp Business API, SMS, IVR, authentication, and AI chatbots using React, Node.js, and MongoDB.

Experience

Founder & Project Lead – ADEX_IN **2026 – Present**

- Lead a multidisciplinary student team developing accessibility-focused products, starting with ADEX_ISL.
- Coordinate technical architecture, product planning, documentation, and project execution.

Software Development Intern – Codec Technologies **Dec 2025 – Jan 2026**

- Developed application features using React.js, Node.js, Express.js, and MongoDB, including REST APIs and authentication within an Agile team.

Founder – Hell Out Café **2023 – Present**

- Operate a café and use its workflows to develop and test POS software covering QR ordering, Kitchen Display System, inventory, offline synchronization, and operational analytics.

Freelance Full Stack Developer **Nov 2022 – Present**

- Delivered custom web applications, dashboards, and automation systems for clients.
- Integrated authentication, payment gateways, REST APIs, databases, and third-party services.

Leadership

- **Founder, Entrepreneurship Cell** – Led a 70-member student team and organized innovation and entrepreneurship initiatives.
